

## Self-Assessment of Contextual Fit in Schools

Horner, Salentine, & Albin, 2003

The purpose of this interview is to assess the extent to which the elements of a behavior support plan fit the contextual features of your school environment. The interview asks you to rate (a) your knowledge of the elements of the plan, (b) your perception of the extent to which the elements of the behavior support plan are consistent with your personal values, and skills, and (c) the school's ability to support implementation of the plan.

**Scoring the Self-Assessment of Contextual Fit**

This instrument may be used to build a summary score and sub-scale scores that have been helpful both for researchers and for individuals building behavior support plans. To build Contextual Fit scores calculate the mean score per subscale, and then build a total score by calculating the mean of the subscale scores.
