Dynamic Learning Maps Essential Elements

To help educators understand the Essential Elements (EE) of the Common Core State Standards and their application to students with significant cognitive disabilities, the Dynamic Learning Maps™ (DLM) consortium has created and will continue to create self-directed learning modules. Each of the interactive modules is short (30-45 minutes on average) and focuses on a single topic. One hour USOE credit is available per module for teachers of students with significant cognitive disabilities.
